

**Endorsed**

***A field and video-annotation guide for baited remote underwater stereo-video surveys of demersal fish assemblages***

**Author(s):** Langlois, T., Goetze, J., Bond, T., Monk, J., Abesamis, R.A., Asher, J., Barrett, N., Bernard, A.T., Bouchet, P.J., Birt, M.J., Cappo, M., Currey-Randall, L.M., Driessen, D., Fairclough, D.V., Fullwood, L.A., Gibbons, B.A., Harasti, D., Heupel, M.R., Hicks, J., Holmes, T.H., Huveneers, C., Ierodiaconou, D., Jordan, A., Knott, N.A., Lindfield, S., Malcolm, H.A., McLean, D., Meekan, M., Miller, D., Mitchell, P.J., Newman, S.J., Radford, B., Rolim, F.A., Saunders, B.J., Stowar, M., Smith, A.N., Travers, M.J., Wakefield, C.B., Whitmarsh, S.K., Williams, J., and Harvey, E.S.

**Essential Ocean, Climate, Biodiversity Variable(s):** Fish EOVS

**Supporting or other variables:** Benthic habitat

**Network(s):** stereo-BRUVs, BRUVs

**Sensors:** NA

**Endorsed by (GOOS PANEL, eg OCG, BIOECO):** BIOECO

**Endorsement date:** 8 September 2020

**DOI Identifier:** <https://doi.org/10.1111/2041-210X.13470>

**Links to previous versions or full manuals if this is a summary paper:**

Field Manuals for Marine Sampling in Australian Waters, Version 2

<http://dx.doi.org/10.11636/9781925848755>

***This manual has been endorsed by the GOOS Biology and Ecosystems Panel of Experts as a globally accepted best practice for conducting research with baited remote underwater stereo-video systems.***

*The GOOS best practice endorsement process has been developed by the GOOS and the Observation Coordination Group (OCG) in conjunction with the Ocean Best Practices System (OBPS).*

*The aim is for global networks (eg the International Argo programme through GOOS OCG) or groups of experts (eg. the GOOS Biogeochemical Panel) to endorse and share methods which have reproduced superior results for confidence in and uptake by the broader ocean community.*

*The endorsed methods can range from standard operating procedures to field manuals and have been adopted by community review as 'globally' accepted methods. Following best practices improves the reproducibility of science research, and interoperability across disciplines and datasets by standardizing methods and data collection. It allows for research to be more efficient, leads to quality datasets, and supports future proofing data.*

*Endorsed GOOS best practices have been through a strong identifying process. They have been adopted and used by established ocean observers and therefore represent a strong basis for the ocean science community. The document will be updated and re-endorsed as appropriate.*
